

I have had the opportunity to attend a couple of full college courses at Massachusetts Maritime Academy, in the subjects of Oceanography and Aquaculture. In these college courses I learned the workings of how a college class works and how technology is integrated into the college curriculum, especially within the sciences. The course required dedication, time, and teamwork in order to complete assignments and projects. The projects given to us through this course would be near impossible to do without integration of technology, specifically integration with Google Drive.

Technical competencies and academic skills demonstrated by completing this assignment.

Framework Standard	Description
2.A.03	Practice proper communication and professionalism
2.J	Essentials of Document Processing
2.k	Essentials of Presentation Management
Embedded Academics	Description
2.C.01.02	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the Effective selection, organization, and analysis of content.
